Comments about Mapex Armory Series 6-Piece Studioease Shell Pack: I have had this kit for 5 days now, and i am VERY pleased.. ) the set up was easy, and with the Soniclear bearing edges i barely tuned them and they sound awesome (with stock heads on!) The Tomahawk steel snare has a nice cutting sound and comes with a coated ambassador on it.. The bass drum is probably my favorite part It has a very deep, fat, but full sound that you can only get with an 18X22.

The tone and resonance of these drums is absolutely wonderful You can also trade in the Tomahawk snare within two weeks if you want to. [Maschine Basement Era](#)

All in all, this kit is a high quality kit for a great price, and will give you a nice punchy sound, and the toms can sound either very deep and modern or traditional (depends on heads.. You'll have two weeks after your Armory kit purchase to test out the Tomahawk and, if the Tomahawk snare doesn't fit your sound, you can trade it in directly with Mapex for one of the other four Armory Snare drums at no charge.. Squarespace is the all-in-one solution for anyone looking to create a beautiful website.

Mapex lists this kit as thier top mid line kit, but don't let that fool you These are top of the line quality.. The first very noticeable feature of these drums are the lacquer finish (I own the photon blue finish,very nice and sparkles awesome under lights.. Mapex isn't lying about the wide tuning range and ease of tuning with these If you are looking at these as a possibily for your next kit, stop looking and get them.. I highly recommend this drum set Comments about Mapex Armory Series 6-Piece Studioease Shell Pack: I bought this kit in the transparent walnut.. In addition, all Armory shell packs include the 14' x 5-1/2' Tomahawk Black-Plated snare.. SONIClear bearing edge, tom suspension and floor tom legs allow the heads to sit flat and increase shell resonance.. It is better looking than the picture The finish, bearing edges and hardware are all perfect.. Add on some decent cymbals, and your sure to have a stellar sounding kit This kit is perfect for live, but would make a just as good studio kit as well, with its nice balanced tones. 773a7aa168 [Vir Digital Patch Panel](#)
