Increase productivity and provide superior service to your clients, from conceptual design through construction, by producing detailed drawings and accurate cost estimates even in the most preliminary stages of your projects.. Analysis, design and investigation of beams, one and two-way slab systems, flat plate, flat slab, waffle slab and slab bands.

Moment capacities about the orthogonal axis are ignored To compute the moment capacity at a certain level of axial load, the neutral axis angle is held constant, parallel to the selected axis.. Quickly design and analyze any concrete project with confidence, complying with international concrete specification requirements.. Our cookies do not store any sensitive information, and we never use your cookies for targeted advertising.. We have information here on how you can do that Efficiently obtain reinforcement quantities for both your gravity and lateral frames, and quickly compare alternative design schemes with accurate material takeoffs for all of your concrete projects.. Systems Analysis & Design Results Output Advanced Features Slenderness With newly introduced spResults and spReporter Modules and powered by the advanced and flexible graphical interface of new spSection Module for creating and modifying irregular sections, spColumn v6.. • For uniaxial runs, positive and negative moment capacities about only the selected axis are computed. Strength investigation and If you want, you can change your computer's settings so that it does not accept cookies.. 00 is widely used for design and investigation of columns, shear walls, bridge piers as well as typical framing elements in buildings and other structures.. The section can be rectangular, round or irregular, with any reinforcement layout or pattern.. Import/export of DXF files, nominal interaction diagrams, and display of capacities at your load point are just a few of the rich program features.. Formerly pcaColumn, PCACOL, and IrrCOL, spColumn investigates sections that are impossible to find on design charts or to do by hand.. Top selling worldwide, spColumn provides a full featured 3D visualization of the nominal and factored failure surface.. Easily produce complete CAD files on the fly for your floor framing plans, frame and wall elevations, and beam and column schedules. ae05505a44 [Prodad For Mac](#)
